Community Improvement Districts?

How should places respond?

vitality is reflected in how busy a centre is at different times and in different parts

viability refers to the ability of the centre to attract continuing investment, not just for maintenance, but also to allow improvement and adaptation to changing needs

There are towns in this country that may never see retail occupiers coming back into their high street again.

25 Priority Interventions for High Streets

SPRINGBOARD.

High Street UK2020

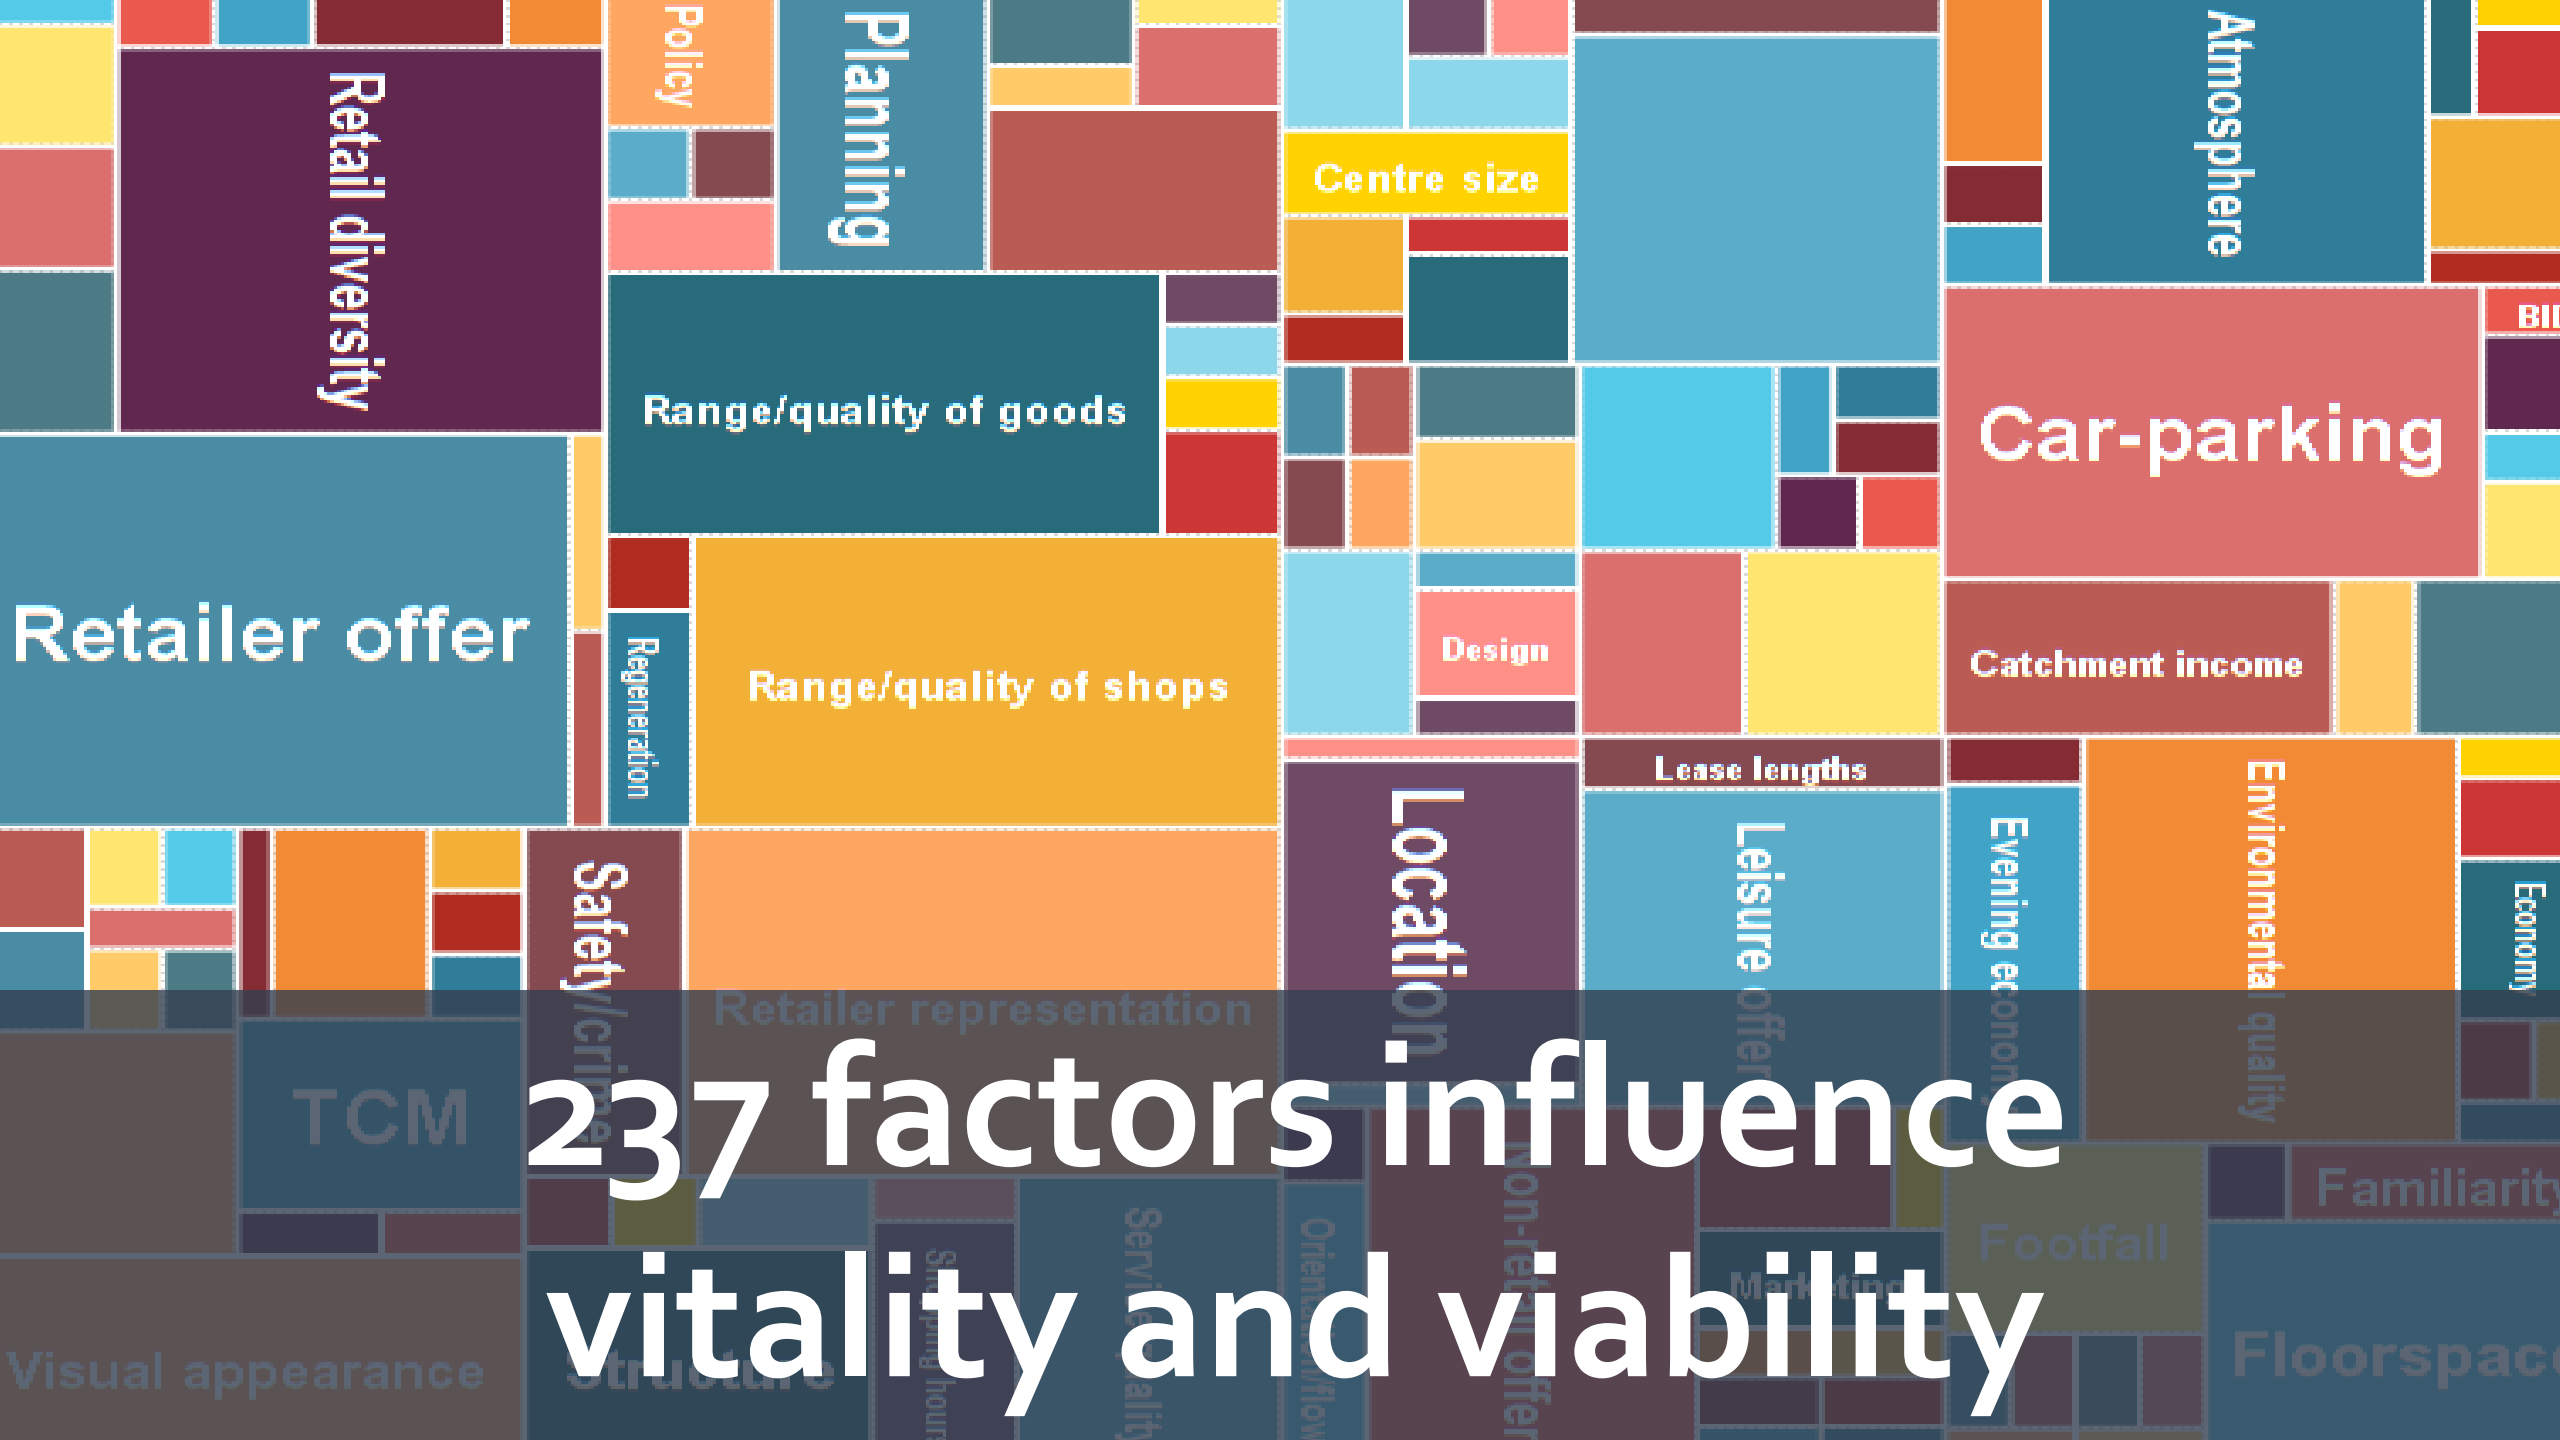

#HSUK2020

vitality is reflected in how busy a centre is at different times and in different parts

viability refers to the ability of the centre to attract continuing investment, not just for maintenance, but also to allow improvement and adaptation to changing needs

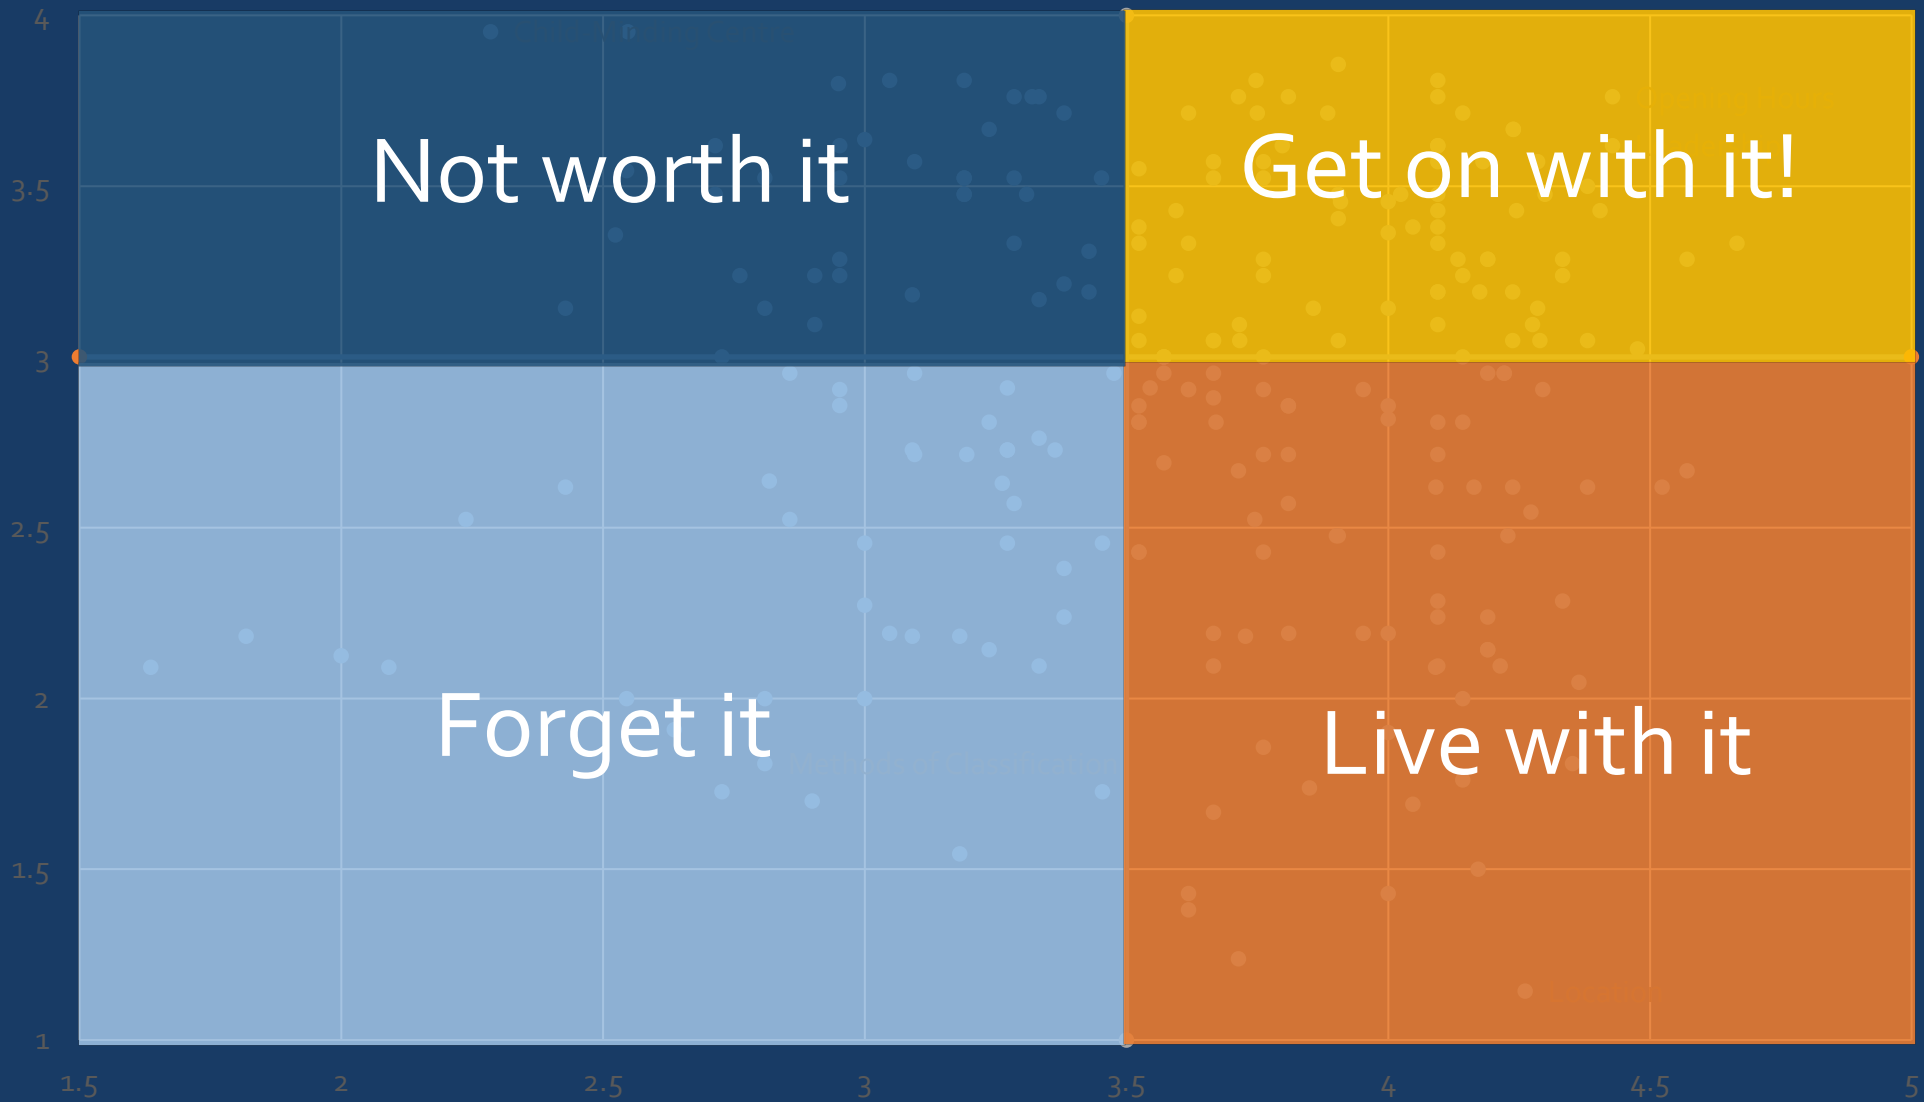

**237 factors influence
vitality and viability**

#1 How much influence each factor has on the vitality and viability of the High Street?

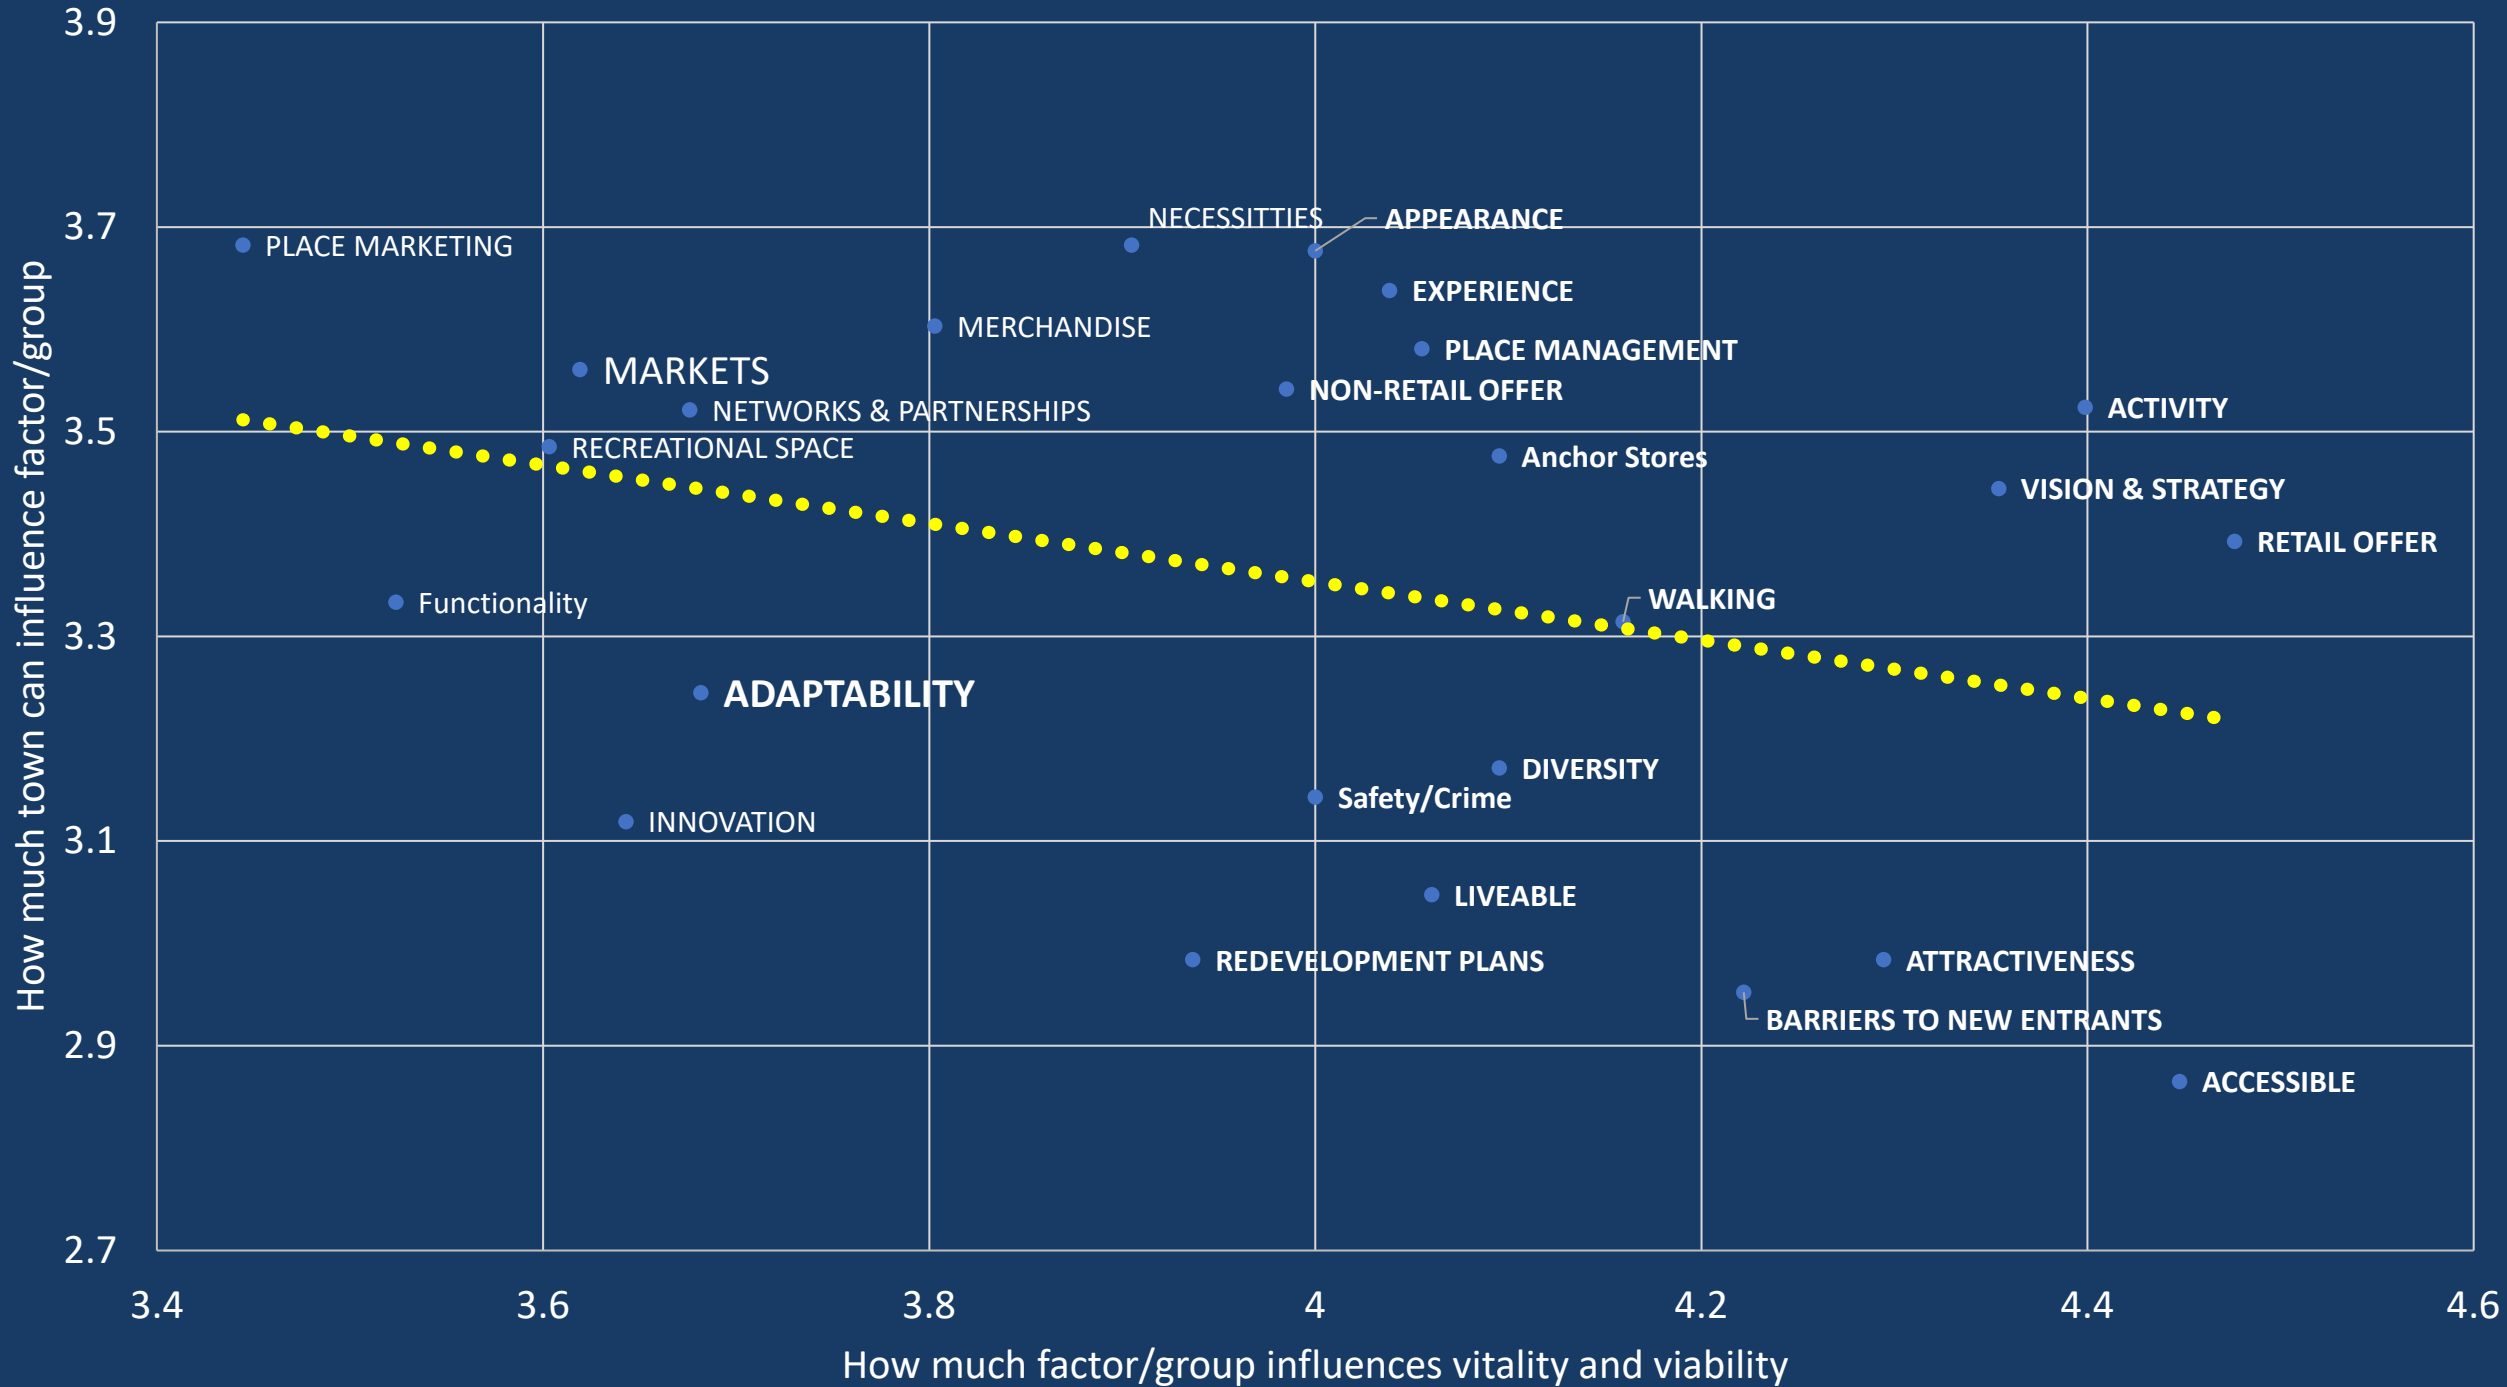

#2 How much control a location has over the factor?

How much control over a factor

How much each factor influences vitality and viability

The 25 priority interventions: in order

ACTIVITY

RETAIL OFFER

VISION & STRATEGY

EXPERIENCE

APPEARANCE

PLACE MANAGEMENT

NECESSITIES

ANCHORS

NON-RETAIL OFFER

MERCHANDISE

WALKING

PLACE MARKETING

DIVERSITY

NETWORKS & PARTNERSHIPS

ATTRACTIVENESS

MARKETS

RECREATIONAL SPACE

BARRIERS TO NEW ENTRANTS

SAFETY/CRIME

LIVEABLE

ADAPTABILITY

ACCESSIBLE

REDEVELOPMENT PLANS

FUNCTIONALITY

INNOVATION

The 25 priority interventions: putting plans into action!

- Shopping
- Work
- Leisure
- Transport
- Social exchange

ACTIVITY: Patterns of everyday usage

Indicative interventions: short term:

- Compare activity data with modal opening times
- Experiment with new opening times

- Improve synergies between high street and key place based anchors

Indicative interventions: long term

All centres might benchmark themselves against the 25 Priorities

Moving from plans to action: The 4Rs Framework

REPOSITIONING

REINVENTING

REBRANDING

RESTRUCTURING

knowing your town, using relevant data and information to develop a collaborative, inspiring vision that achieves change

REINVENTING

REBRANDING

RESTRUCTURING

knowing your town, using relevant data and information to develop a collaborative, inspiring vision that achieves change

activating and animating the town, diversifying its attractions, to become multifunctional

Offering different things that serve the community and draw in footfall and spend

REBRANDING

RESTRUCTURING

knowing your town, using relevant data and information to develop a collaborative, inspiring vision that achieves change

activating and animating the town, diversifying its attractions, to become multifunctional

Offering different things that serve the community and draw in footfall and spend

establishing an identity and sense of place that can engender pride, commitment and attachment

communicating this across the whole community – positive, consistent and effective messaging

RESTRUCTURING

knowing your town, using relevant data and information to develop a collaborative, inspiring vision that achieves change

activating and animating the town, diversifying its attractions, to become multifunctional

Offering different things that serve the community and draw in footfall and spend

establishing an identity and sense of place that can engender pride, commitment and attachment

putting in place the capacity, leadership and partnerships to deliver change

communicating this across the whole community – positive, consistent and effective messaging

if large-scale spatial change is needed to transform your centre how will local governance need to change

Where do you think your town is?

Reposition

- We don't know who uses our town centre
- We don't know how our town centre functions
- We have data but don't do anything with it
- We don't have a clear idea about how future trends will affect the high street
- We don't have a clear and shared vision for the future of the town centre

Reinvent

- We have plans but nothing is going on in our town centre
- We rely on the existing offer to drive footfall
- We rely mainly on shopping to attract people
- We find that local people go elsewhere for the products and services they need or want
- We don't know how to change the offer in our centre

Rebrand

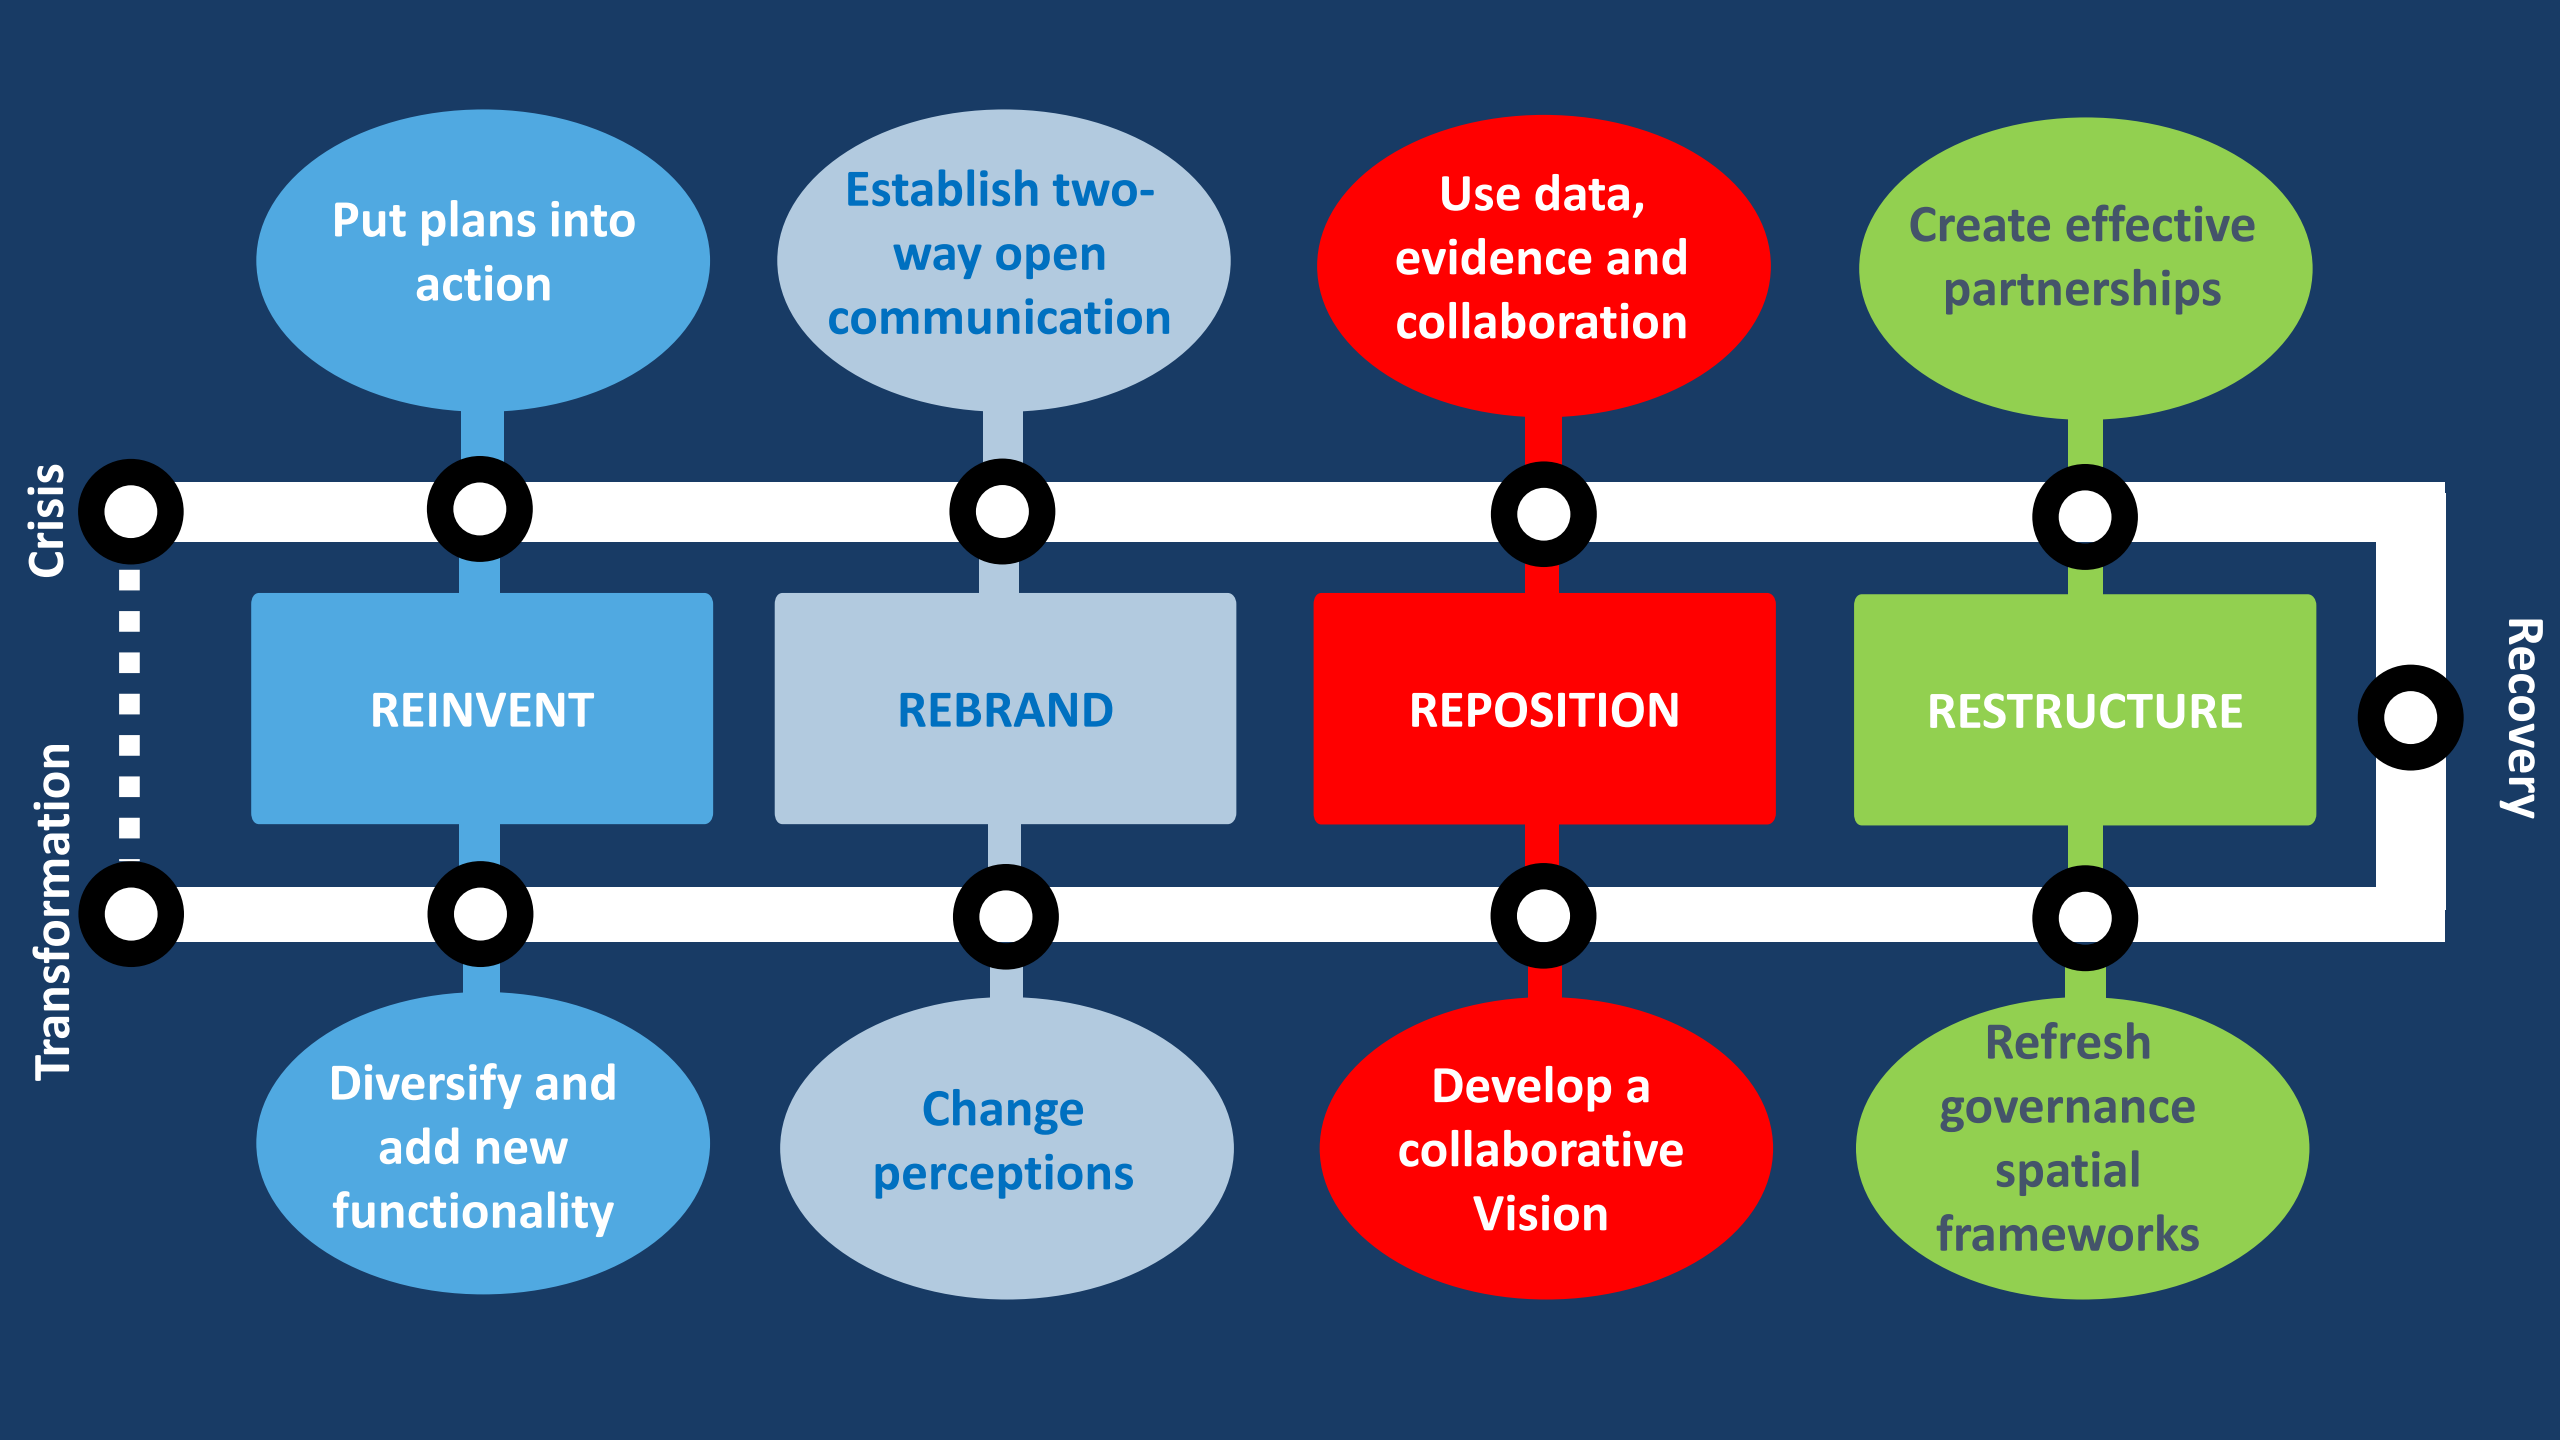

- We have lots of things happening but the town still has a poor reputation
- We need to change perceptions
- We don't communicate well with other local stakeholders
- We don't do enough to celebrate local distinction and creativity
- We don't have a clear sense of place

Restructure

- We can't make decisions
- We have done things in past but they haven't worked
- We don't speak to other local stakeholders
- We don't know how to engage with a wider group of stakeholders
- We need large-scale physical change to make a real difference

Transformation

Recovery

Go through the recommendations— invite comment and feedback as to their viability, but also who is best placed to lead on each one

Reinventing: key recommendations

QUICK WINS

Review a range of place-based anchors (retail, employment, transport, green space, markets, heritage, culture), everyday activity that significantly attracts footfall in each town centre.

Review and share place-making best-practices at a county level.

Establish a forum (either online/hybrid) for local stakeholders to share ideas, challenges, and best practice.

Encourage local stakeholders to Review High Streets
Taskforce Webinar: Reinventing – Making Vital and Viable
Multifunctional Hubs

LONGER TERM

Ensure key place-based attractors are embedded in local plans and visions for the town centre and included in wider messaging.

Undertake place-making workshops with local towns where this is a priority. The purpose of these workshops would be to engage local stakeholders in the generation of ideas for place-making activities, and to delegate delivery to specific organisations and individuals.

Each town to generate a programme of potential place-making interventions, tailored for each centre, drawing on mainly low-cost / short-term activities. Activities should be clearly linked to named organisations/individuals responsible for their delivery. Use footfall and other KPIs to measure impact on new activity.

Rebranding: key recommendations

QUICK WINS

Assess the digital footprint of each town centre

Review stakeholder communication and devise a process for sharing news, events, and knowledge amongst local stakeholders. During this review, each town should consider:

- Have the unique aspects of the town been uncovered and are they being promoted?
- Do you have a nice town, but everyone talks it down?
- Is everyone updated on what the plans are?
- Is there lots of informal communication and networking?

Each town should develop low-cost and coordinated social media activity to communicate the centre-offer and increase its visibility to existing catchment and users.

LONGER TERM

Undertake place sentiment analysis to inform and establish an evidence base for any wider reputational issues

On the back of visioning exercises, each town should construct a clear and positive message about their high street/town centre, that is shared consistently by local stakeholders.

Engage with wider stakeholders responsible for promoting Warwickshire at a county level, e.g., review alignment between local place promotion and DMO material.

Repositioning: key recommendations

QUICK WINS

Ensure footfall data is widely available and can be accessed by local traders, event organisers and other place-based stakeholders to demonstrate success of delivery.

Review what other data is available for each town and devise a simple and cost-effective mechanism for sharing this information with local stakeholders e.g., create an online Warwickshire High Street and Town Centre monitoring hub.

Review High Streets Task Force Webinar: Repositioning Developing Collaborative Inspiring Visions that Achieve Change.

Conduct a review of existing town centres visions and score them by benchmarking against the IPM's 25 Priorities.

LONGER TERM

Continue to track effectiveness of interventions in the town centre through monitoring and interpreting footfall data (volume and pattern of activity), providing impact assessment of events etc.

Establish a clear and consistent method for collating footfall data in each town e.g., ideally installation of automated footfall counters.

Data collection, analysis and data communication training for local government officers and other local stakeholders.

Undertake visioning workshops or exercises in each town and establish clear and collaborative visions for each centre, benchmarked against the IPM's 25 Priorities.

Restructuring: key recommendations

QUICK WINS

Each town should review its existing networks and partnerships, by conducting stakeholder mapping, and reach out to new or previously excluded groups who can contribute collaborative capacity.

Where appropriate, each town might consider refreshing local networks to widen their diversity and add additional capacity to effect change locally

Refresh networks at a county-wide level to support closer alignment between regional policies and strategies involving high street revitalisation and place leadership

Review internal structures within Warwickshire County Council and to assess how different directors might better work together in support of place-based outcomes

LONGER TERM

Each town to form a strategic leadership group (town team), but then also delegate specific responsibilities to sub-groups, with local authorities supporting the facilitation and co-ordination of this network

Establish county-wide High Streets Taskforce bringing together key strategic leads e.g., transport, tourism, business growth and development etc.

Establish internal town-centre strategic team with representatives from different directorates.
